This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 952051

**STEPPING UP AND
BRINGING OUT THE
SCIENTIFIC EXCELLENCE
AND INNOVATION CAPACITY
IN SOIL RESEARCH OF THE
UNIVERSITY OF LISBON**

SOIL IS MUCH MORE THAN YOU THINK.

THE TEAM

Our consortium is made up of four partners, located in Portugal, Belgium and Israel.

FCiências.ID – Associação para a Investigação e Desenvolvimento de Ciências (including the Faculty of Sciences of the University of Lisbon) is the project coordinator. MIGAL (Israel) and the University of Ghent (Belgium) are two internationally leading research organisations in soil sciences and sustainable technology applied to the agricultural sector. The communication and dissemination of the project results, as well as the networking and international positioning activities, are powered by euknow (Belgium).

ABOUT US

The project SOILdarity is designed to make a small contribution to the global effort of guaranteeing a healthy and productive soil and supporting its fundamental ecosystem services. As a twinning exercise, SOILdarity develops strategies to build on and strengthen the existing research and innovation capacities of the partners in several domains revolving around soil sciences.
